Rock Rails

When you take your FJ Cruiser off road, the sill (lower body area under the door), doors and side of the body are vulnerable to damage from scraping and bashing against large rocks. Repairing this damage can be costly. Toyota Genuine Rock Rails are made from heavy duty-steel and are designed to protect your FJ Cruiser from damage that can occur when driving over rocky terrain by fending off the direct impact. Toyota Genuine Rock Rails are easily installed to existing vehicle mounts and are electro-deposition coated ("e-coat"-ed) to protect against corrosion. (Left and Right Rock Rails sold separately)
